

XXIIth Cologne Minisymposium on Plant Biology

Wednesday – October 4th, 2017

Welcome

- 12.30 – 13.15 **Bernd Weisshaar, University of Bielefeld, Germany**
"From mapping a locus affecting flavonol glycoside accumulation to analyses of a gene family encoding acyl-glucose-dependent glucosyltransferases."
- 13.15 – 14.00 **Henrik Buschmann, University of Osnabrück, Germany**
"The Evolution of Cell Division: from Algae to Land Plants."
- 14.00 – 14.45 **Vanessa Wahl, Max Planck Institute Potsdam, Germany**
"T6P and nitrate singling gating developmental transitions: transferring knowledge gained in Arabidopsis thaliana to Solanum tuberosum."
- 14.45 – 15.15 30' Coffee Break
- 15.15 – 16.00 **Thomas Ott, University of Freiburg, Germany**
"Dynamic patterning of cell surface receptors and partners."
- 16.00 – 16.45 **Outi Savolainen, University of Oulu, Finland**
"Natural selection and phenotypic plasticity of gene expression and methylation in locally adapted populations of Arabidopsis lyrata."
- 16.45 – 17.00 15' Coffee Break
- 17.00 – 17.45 **Pierre-Marc Delaux, LRSV Toulouse, France**
"Evolution of plant symbioses."
- 17.45 – 18.30 **Sandra Heinrich, University of Hamburg, Germany**
"Molecular ecophysiology- linking physiological and transcriptomic analyses in macroalgae."
- 19.30 **Dinner in "Hellers Brauhaus", Roonstraße 33,
50674 Cologne**

Guests are welcome!

Venue: Lecture Hall 0.024 Cologne Biocenter, University of Cologne, Zùlpicher Str. 47b, 50674 Cologne
